WELCOME TO OUR SCHOOL

July 21st, 2023

Cambridge International Newsletter is back with fresh updates!

In this edition:

- [School Calendar 2023/2024](#)
- [List of selected textbooks](#)
- Meet New Teachers

- Holidays are around the corner, and we must have everything ready before taking some days off. The Cambridge International Curriculum will start on September 4th for our students.
- The students' timetables are prepared so that **lessons start at 9:00 and finish at 16:30** and will be available on our website at the beginning of September.
- The school will distribute the textbooks on September 4th and the respective debit will be processed in the September and/or October invoice.
- Until then, any clarification can be given by our Cambridge Curriculum Coordinator, Filomena Martins via email at filomena.martins@eitv.pt or directly by our admissions office via a call to **261 919 116** ext 4106.

NEWSLETTER

We are currently finishing hiring our teachers and in the process of organising our classrooms according to a new layout.

Thus, National and International Curriculum students can socialise by year group during breaks and lunchtime. This layout aims to promote cultural exchange and improve their communication skills.

MEETING OLGA KUCZEREPA:

Olga has worked in education since 2009 and obtained her teaching credentials in 2017 at the University of Sunderland, UK. She completed her Masters at the University of Warsaw and complemented her educational background with postgraduate certificates and courses at accredited universities (Universidad de Castilla la Mancha in Ciudad Real – Spain), including Harvard University. Throughout her teaching journey, she's worked in international schools as a teacher and coordinator in Poland, Spain and Bahrain. She is a devoted educator who believes every student is capable of achieving greatness with the appropriate direction and motivation.

MEETING PAULO CRAVEIRO:

Paulo Craveiro began to see the world through science in his Chemistry BSc, this was followed by a Biochemistry MSc where he developed adaptations of Ink-Jet systems for Biomedical applications and would lead him on a journey to China for further PhD studies on Nanoparticles applied to Cancer Research. It was there that the call for teaching awoke in a path that led him to our School. Paulo works on inspiring young minds to become the best version of themselves as both students and individuals in nurturing and collaborative environments where the pleasure of discovery provides the tools for the future.

NEWSLETTER

MEETING RAMONA FAAS:

Ramona is a sports scientist with a profile in health care. She has been working in the field of sports and physical education with children and adolescents for over 10 years. She has worked in a private school in Germany as a sports and swimming teacher for all grades and she was a class teacher of a second class. After she managed a children's swimming school in a large sports club.

In May 2021, one of her greatest passions, surfing, brought her to Portugal. Here she worked first as a surf instructor and then as a supply teacher in the afternoon daycare at the German school in Lisbon.

She is very happy starting to teach physical education in our school. Teaching young people in sports, motivating them and being able to accompany them on their journey through life is her great professional passion.

MEETING MAFALDA SOBRAL :

Mafalda is set to present her thesis for the master's degree in Portuguese as a Second Language at the Lisbon School of Arts and Humanities. With experience as a lawyer, and teaching PAL (Portuguese Additional Language) she sees Portuguese as a powerful tool to teach interculturality to 21st-century learners. Having grown up in a mixed Spanish/Portuguese culture, she believes language exploration fosters understanding, critical thinking and strong values.

Through collaborative projects, community outreach and engaging activities Portuguese becomes a means to connect with peers and the local community with a sense of belonging.

ENJOY A LOVELY SUMMER!
